CUPE PRO-D
Effective April 2023

The following list outlines the parameters for accessing CUPE Pro-D funding. Applications for funding can be accessed through [Laserfiche](#) and will be approved on a first come – first served basis.

1. $750 per member can be accessed once per school calendar year (July-June).

2. Must be job relevant to a position within SD 20 which may not be your current classification.

3. $100 of $750 can be used towards learning material (once a year) relevant to a current position in SD 20.

4. The funds must be accessed at the same time. eg: if there is a workshop you know that you would like to attend, and there is literature that is relevant for that workshop – this would need to be applied for all at once. You cannot apply for the workshop and then submit another application later for the literature.

5. Applications will go through an approval process, and you will be required to provide supporting documents.
